Happy New Year! I hope your 2015 is off to a great start.

At the Mushroom Council, we value your role as a nutrition professional and all the hard work you do to improve public health. We too are passionate about bringing healthier options to the table that you and your clients can feel good about it. This underlying passion for health is what fueled the creation and launch of the Blend – blending meat with mushrooms – to reduce calories, fat, and sodium intake, and add more vegetables and vitamins and minerals to the plate. As a registered dietitian, I believe that healthy food can and should be delicious and the Blend delivers on both promises – clients can still enjoy their favorite foods like burgers or meatballs without sacrificing taste or texture.

The Blend is also a unique dietary solution that can help meet the recommendations set forth by the 2015 Dietary Guidelines Advisory Committee (DGAC) report:

- Encourages dietary patterns high in vegetables and low in red meat.
- Highlights that the composition of burgers can be improved to increase intake of vegetables and to lower intake of sodium and saturated fat.
- Classifies vitamin D and potassium as nutrients of public health concern.
- Finds diets higher in plant-based foods and lower in calories and animal-based foods as more health promoting and associated with less environmental impact than the current U.S. diet.
- Encourages dietary patterns that are lower in sodium (less than 2,300mg sodium per day or age-appropriate Dietary Reference Intake amount) and saturated fat (less than 10 percent of total calories from saturated fat per day).

With a new year comes new ideas and plans for how we can better support you, the nutrition professional, in your everyday role. For starters, we’re bumping up the distribution of our Nutrition News About Mushrooms Newsletter to quarterly so you’ll receive a more regular dose of mushroom 411 in your inbox throughout the year. We’ll also be creating additional nutrition education handouts on various topics for you to share with your clients. It’s important to us that you’re armed with the latest research, news, and educational materials to help make your life a little easier.

And we want to hear from you! Simply reply to this email with any thoughts or suggestions on how we can make this Nutrition News About Mushrooms Newsletter more valuable for you.

Cheers to a wonderful year ahead!

Why Mushrooms May Warrant a Third Food Kingdom

The Mushrooms and Health Summit first introduced the concept of exploring mushrooms as a separate, third food kingdom (fungi), a concept further developed by authors writing in *Nutrition Today: Mushrooms: Biologically Distinct and Nutritionally Unique*. The article brings attention to the variations in nutrient and biological composition between mushrooms and plant and animal-derived foods:

<table>
<thead>
<tr>
<th>Plants</th>
<th>Animals</th>
<th>Fungi</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contain chlorophyll and make their own food through photosynthesis</td>
<td>Ingest their food</td>
<td>Lack chlorophyll and exist on substrate of various compositions when commercially grown</td>
</tr>
<tr>
<td>Contain cellulose</td>
<td>Mammalian cells contain cholesterol</td>
<td>Contain chitin – a polysaccharide derivative of glucose, also found in the exoskeleton of crustaceans</td>
</tr>
</tbody>
</table>

Even without an established third food kingdom in current food grouping systems, key reasons to include mushrooms in nutrition guidance include mushrooms’ ability to improve **diet quality, enhance flavor** while reducing sodium and cutting calorie and fat intake, and providing a good source of a host of shortfall nutrients across plant and animal-based food groups.

Blended Turkey Meatloaf

The secret ingredients to this classic meatloaf is the addition of finely chopped mushrooms; they make it more flavorful and moist.

INGREDIENTS
1/2 lb. mushrooms, finely chopped
1 lb. lean ground turkey
1/2 small onion, finely diced
1/2 tsp garlic & herb seasoning
1 cup breadcrumbs
1 egg
3 tbsp mustard
3 tbsp brown sugar
1/3 cup ketchup

DIRECTIONS
1. Preheat the oven to 350°F.
2. In a large mixing bowl, combine mushrooms, turkey, onion, seasoning, breadcrumbs and egg; mix until evenly combined. Form into lightly greased loaf pan.
3. In a small bowl mix together mustard, sugar and ketchup.
4. Pour sauce over top of meatloaf, spreading until even.
5. Cover with foil. Bake for 60 minutes, or until cooked through.
